Not sure if I was clear, for now we can only support updates on the client level or run an API.

This provides code to be run on a server level.

Unless you can provide an API this will be tabbed for now and can be revisited down the road.

The voice to video app is maybe the one you're thinking of. I put that aside temporarily as I've spent all my available free time finishing this app. Once we finalize this I'll resume work on the Ad on Demand video app.

Hi Bojan,

This the is the updated fx engine for voice lab. The one that was hosted on huggingface. This new version has the three presets we talked about, spotty service, street sounds and bathroom caller. Sorry it's taken so long I've been editing and editing it.

Hi Darren,

What is this, what happened with this being an API call?

Hi Bojan,

VoiceLabFX is ready for you! I've packaged everything you need into a single zip file.

What's included:

- Complete application with all audio assets
- 3 working presets (Spotty Service, Bathroom Caller, Street Sounds)
- Full documentation (README, Quick Start Guide, Technical Notes)
- All dependencies listed in requirements.txt

Quick Start:

1. Extract VoiceLabFX_ForBojan_20251001.zip
2. Install dependencies: `pip install -r requirements.txt`
3. Verify FFmpeg is installed: `ffmpeg -version`
4. Run: `python3 app_editor_full_ui.py`
5. Open browser: <http://localhost:7860>

What's new:

- All sliders now show true applied values (no hidden multipliers)
- Adjusted slider ranges to usable limits (much easier to dial in effects)
- Simplified quality tier options
- All presets load from JSON (easy to edit)
- Fixed all distortion issues

Documentation:

- QUICKSTART.md - Get running in 5 minutes
- README.md - Full user guide
- TECHNICAL_NOTES.md - Technical details
- DEPLOYMENT_SUMMARY.md - Deployment checklist

Let me know if you have any questions or run into any issues!

Best, Darren
